

You will need a smartphone that is equipped for viewing the lens calibration VR scene and that meets these requirements:

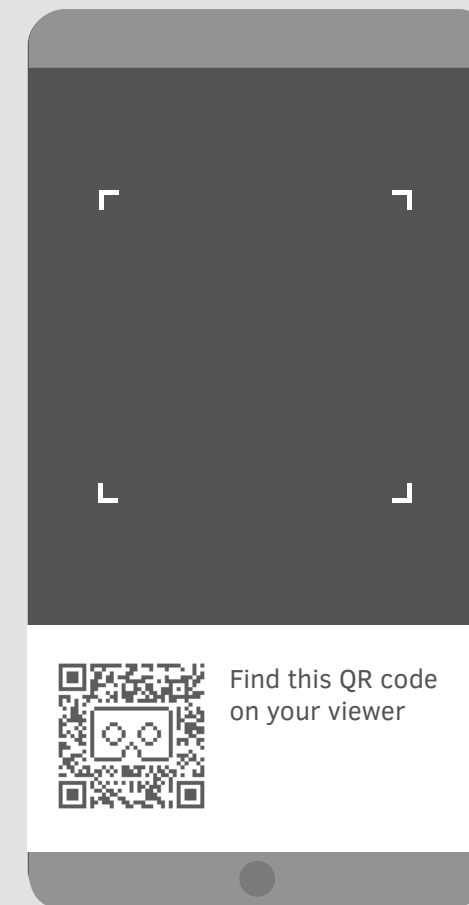

-  Chrome 44+
-  Safari 8+
- The screen should be bigger than the total visible screen area on your viewer

- 1** Using the YouTube app on the phone, load the video and then click on the VR icon

- 2** Click on the Settings icon and choose Setup.

- 3** Set viewer profile by scanning the QR code on the glasses
